HTML & XML

**Assignment 3**  
**Worth 10%**

**Due: May 11th, 2018**

**Requirements:**

- Complete the instructions listed in steps 1 thru 9.
  - Test your webpages.
  - Validate your webpages using the W3C validator.
  - Submit your webpage files, along with any assets, in a zip file in the assignment dropbox on Lea.
- 
1. Continue using the website you created for assignment 2 and add 2 new page.
  2. Use a text editor such as Atom to code the HTML for the website.
  3. Use the doctype for HTML5.
  4. Move the previous embedded styles to an external stylesheet and reference it on all your pages.
  5. Using the new stylesheet you just created, add any new styles to at least 2 elements.
  6. One of your new page must include a form that includes at least the following:
    - Text input limited to 75 characters
    - Input for an email address
    - Select with multiple options that by default has one selection option that is not the first option
    - Large message text box
    - Hidden field with your name as its value
    - Submit button that will post your form to <http://jac.stephmoreau.ca/0071>
    - Button to reset the form to it's original state
    - Labels that are bound to their form element
  7. Including the following elements on either of the new pages:
    - a. A table with a either a row span or column span
    - b. An image map with at least 2 defined areas
    - c. An ordered list, an unordered list, and nested lists
  8. Do not forget to setup navigation between all the pages of your website.
  9. Save the webpages with the extension .html
