Assignment 2   **Due: April 7th, 2018**
Worth 10%

Requirements:
- Complete the instructions listed in steps 1 thru 8.
- Test your webpages.
- Validate your webpages using the W3C validator.
- Submit a text or handwritten document containing your answers to step 2.
- Submit a print of the HTML5 code for the webpages.
- Submit your webpage files, along with any image files, in a zip file in the assignment dropbox on Lea.

1. <u>You</u> will be the topic of this website. You should provide any information about yourself, your home town, your interests, your ambitions, or whatever you want.
2. Sketch a simple wire frame for the website.
3. Use a text editor such as Atom to code the HTML for the website.
4. Use the doctype for HTML5.
5. Add the following css code to the head element of your page. You may alter the values in this css, but do not add additional css rules.

```
<style>
    body {
      background-color: lightblue;
      margin-left: 15%;
      margin-right: 15%;
      border: 2px dotted gray;
      padding: 10px;
      font-family: sans-serif;
    }
</style>
```

6. Complete your web page making sure that it includes the following:
   - Semantic elements (header, nav, article, footer ….)
   - Multiple images (optimized for size)
   - Two different size headings
   - Paragraphs
   - The use of either subscript or superscript
   - A horizontal rule
   - The element <small> and the copyright symbol
   - At least two link to an external webpage

   Do not use any deprecated elements.
   Do not add the style attribute to the elements.
8. Save the web page with the extension .html
